

11<sup>th</sup> June 2023

Occasionally, mainstream *medical mysteries* are involved in some very *curious coincidences*.

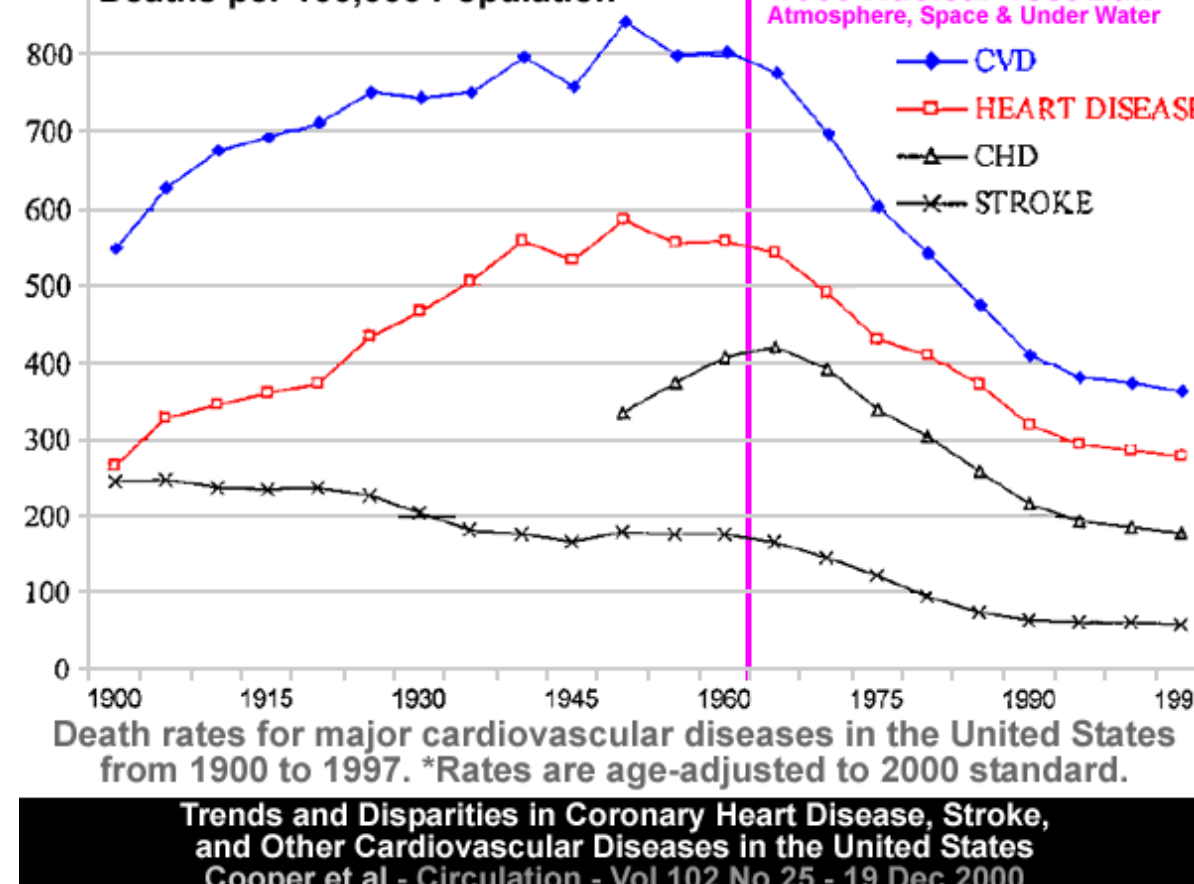

**Curious Coincidence #1**

The 20<sup>th</sup> century collapse in **Heart Disease Deaths** very curiously coincided with the **1963 Treaty Banning Nuclear Weapon Tests in the Atmosphere**.

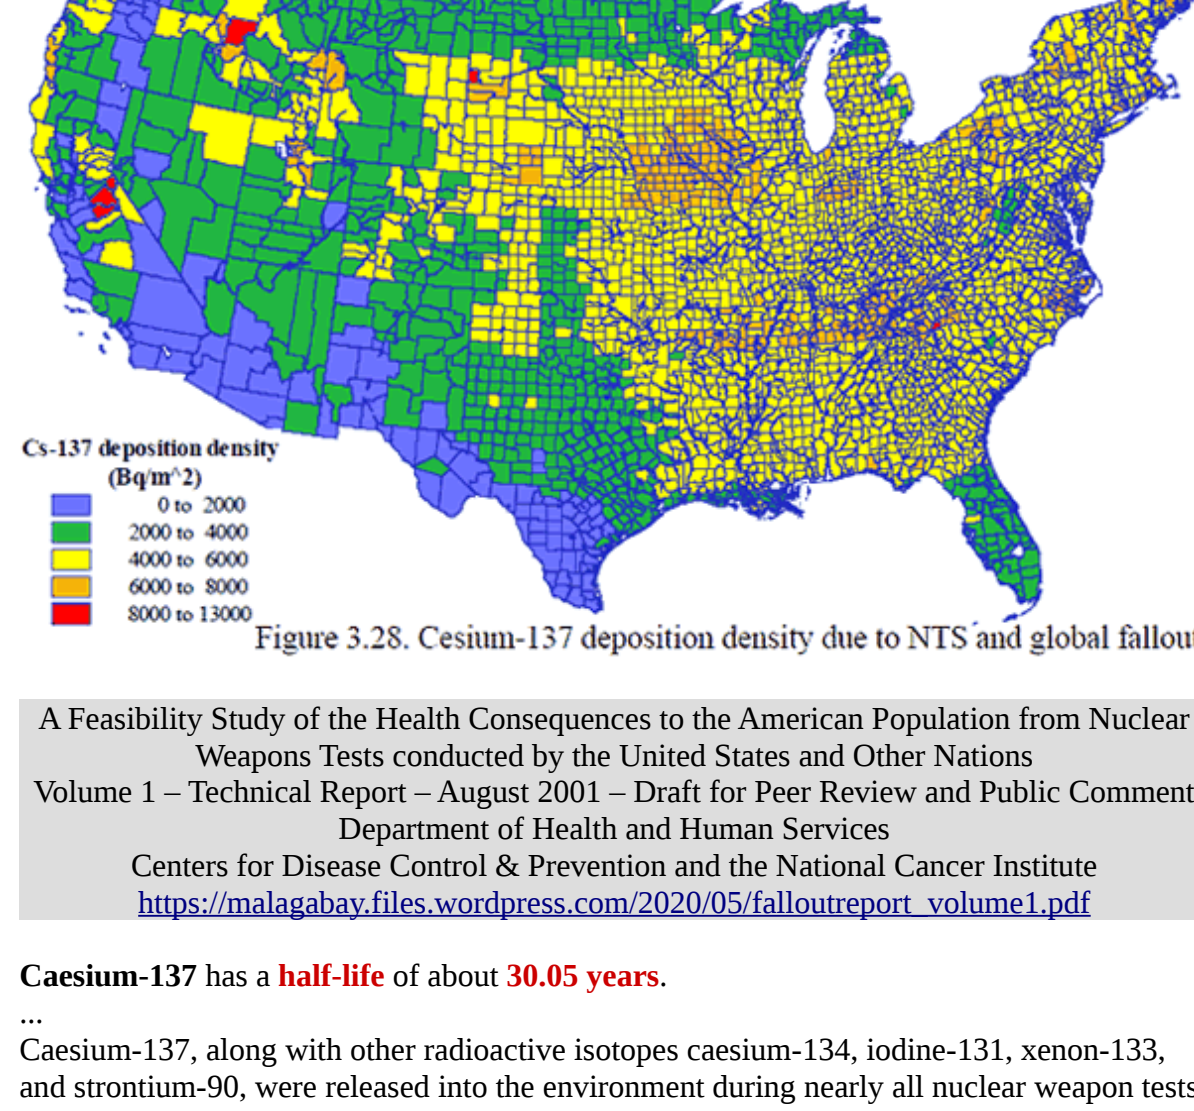

The Partial Test Ban Treaty (PTBT), formally known as the **1963 Treaty Banning Nuclear Weapon Tests in the Atmosphere**, in Outer Space and Under Water, prohibited all test detonations of nuclear weapons except for those conducted underground.

[https://en.wikipedia.org/wiki/Partial\\_Nuclear\\_Test\\_Ban\\_Treaty](https://en.wikipedia.org/wiki/Partial_Nuclear_Test_Ban_Treaty)

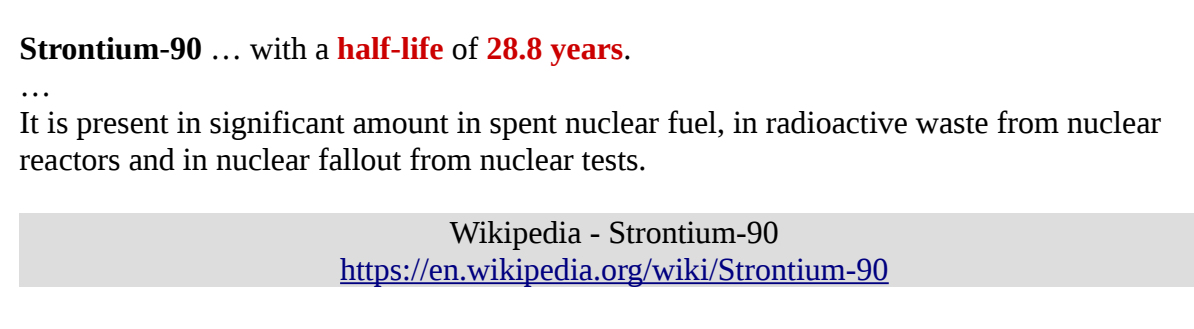

**Curious Coincidence #2**

The *levelling off* in **Heart Disease Deaths** curiously coincided with the **30<sup>th</sup> anniversary** of the **1963 Treaty Banning Nuclear Weapon Tests in the Atmosphere**.

A Feasibility Study of the Health Consequences to the American Population from Nuclear Weapons Tests conducted by the United States and Other Nations

Caesium-137 has a **half-life** of about **30.05 years**.

Caesium-137, along with other radioactive isotopes caesium-134, iodine-131, xenon-133, and strontium-90, were released into the environment during nearly all nuclear weapon tests and some nuclear accidents, most notably the Chernobyl disaster and the Fukushima Daiichi disaster.

Wikipedia - Caesium-137  
<https://en.wikipedia.org/wiki/Cs-137>

**Strontium-90 ... with a half-life of 28.8 years.**

It is present in significant amount in spent nuclear fuel, in radioactive waste from nuclear reactors and in nuclear fallout from nuclear tests.

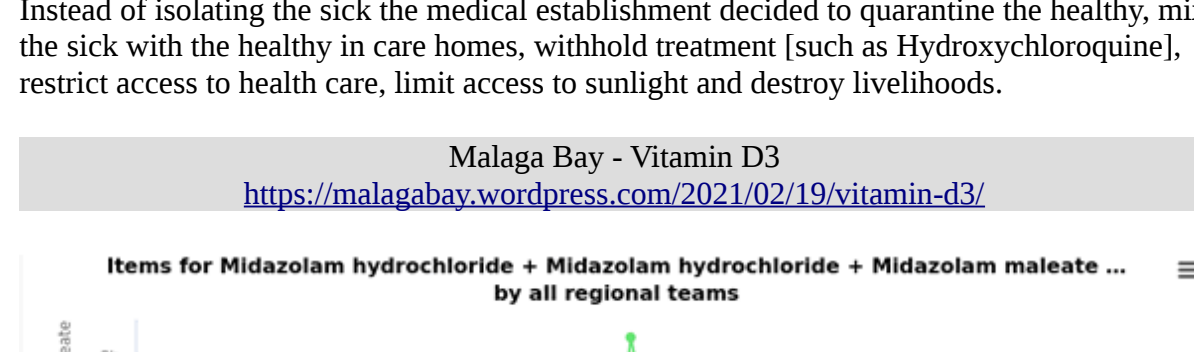

Wikipedia - Strontium-90  
<https://en.wikipedia.org/wiki/Strontium-90>

**Curious Coincidence #3**

A significant spike in **Heart Disease Deaths** very curiously coincided with the beginning of the **CV19 panic** when **heavily sedated** patients routinely died after being placed on a **ventilator**.

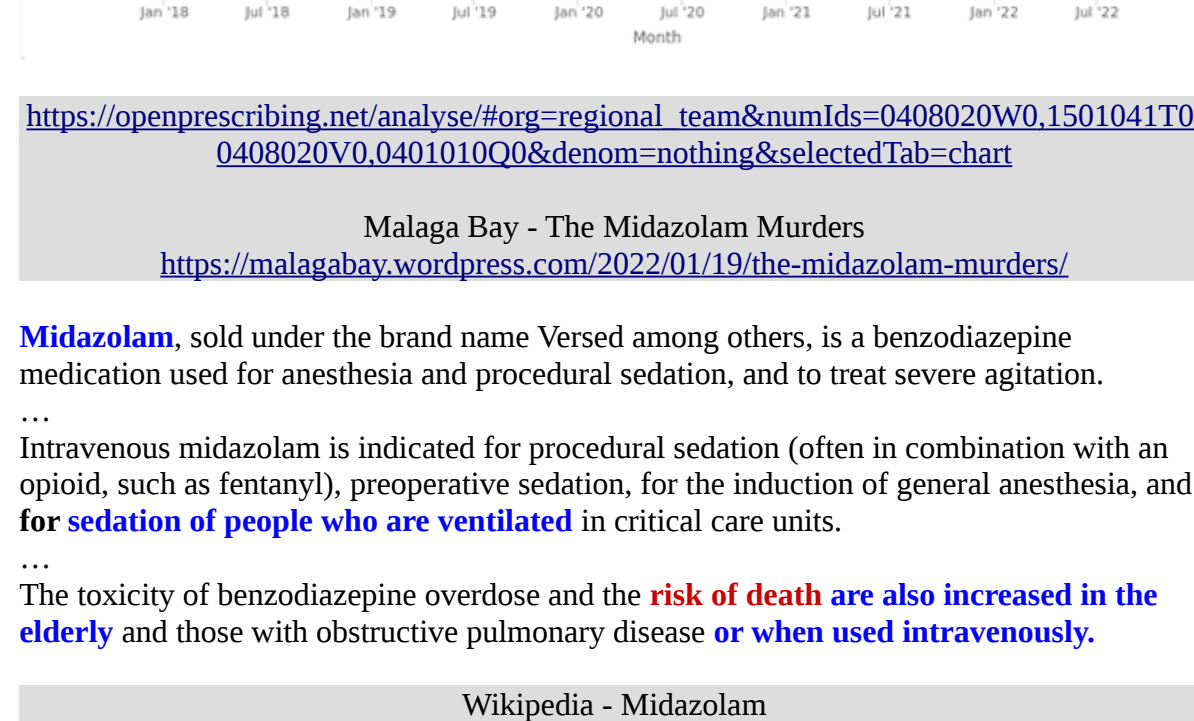

CDC - National Center for Health Statistics  
Weekly Counts of Deaths by State and Select Causes

Instead of isolating the sick the medical establishment decided to quarantine the healthy, mix the sick with the healthy in care homes, withhold treatment [such as Hydroxychloroquine], restrict access to health care, limit access to sunlight and destroy livelihoods.

**Midazolam**, sold under the brand name Versed among others, is a benzodiazepine medication used for anesthesia and procedural sedation, and to treat severe agitation.

Intravenous midazolam is indicated for procedural sedation (often in combination with an opioid, such as fentanyl), preoperative sedation, for the induction of general anesthesia, and for **sedation of people who are ventilated** in critical care units.

The toxicity of benzodiazepine overdose and the **risk of death are also increased in the elderly** and those with obstructive pulmonary disease **or when used intravenously**.

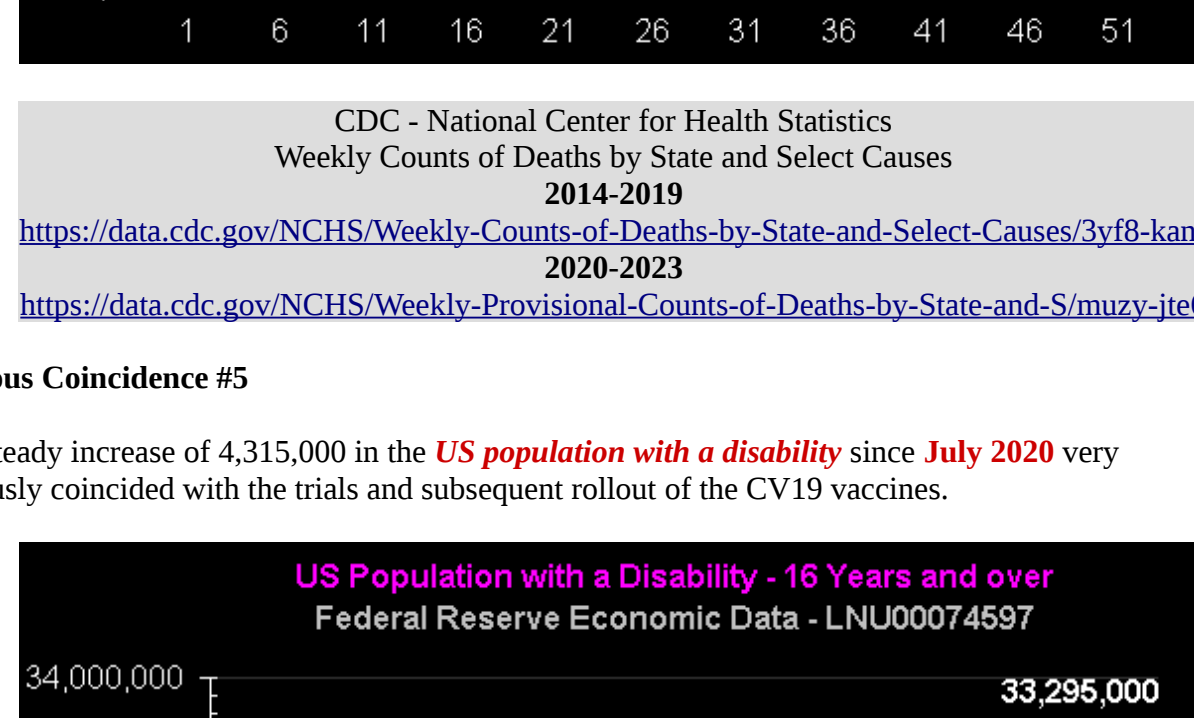

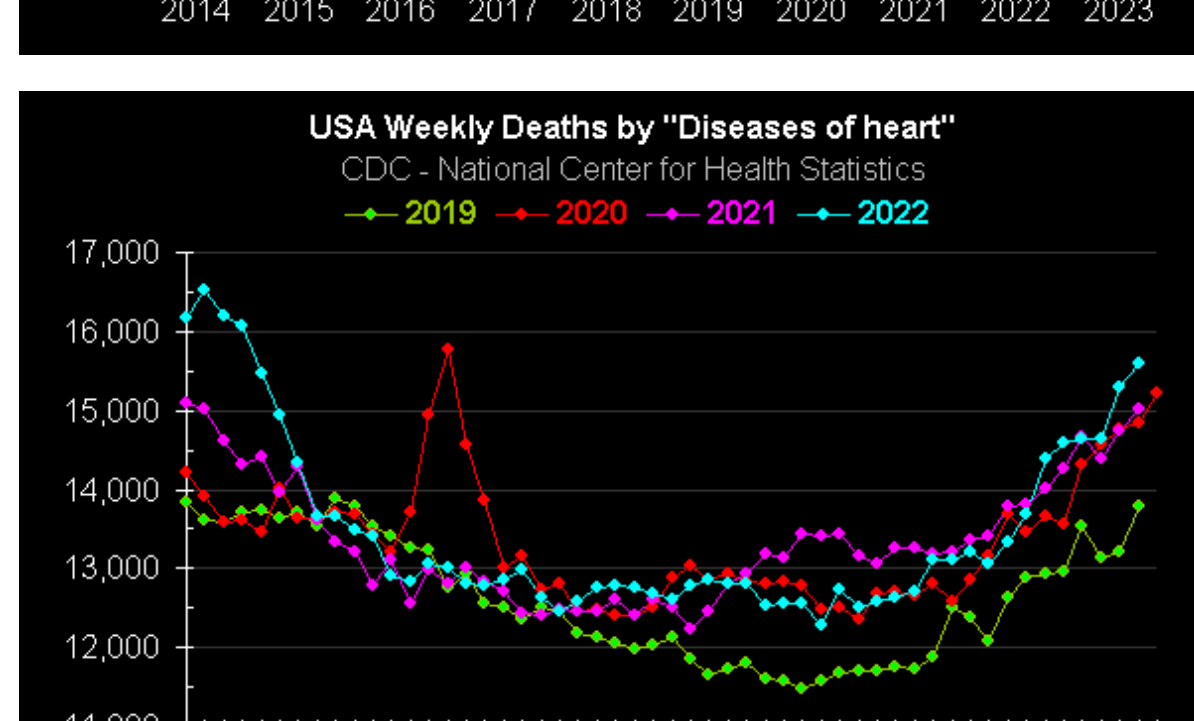

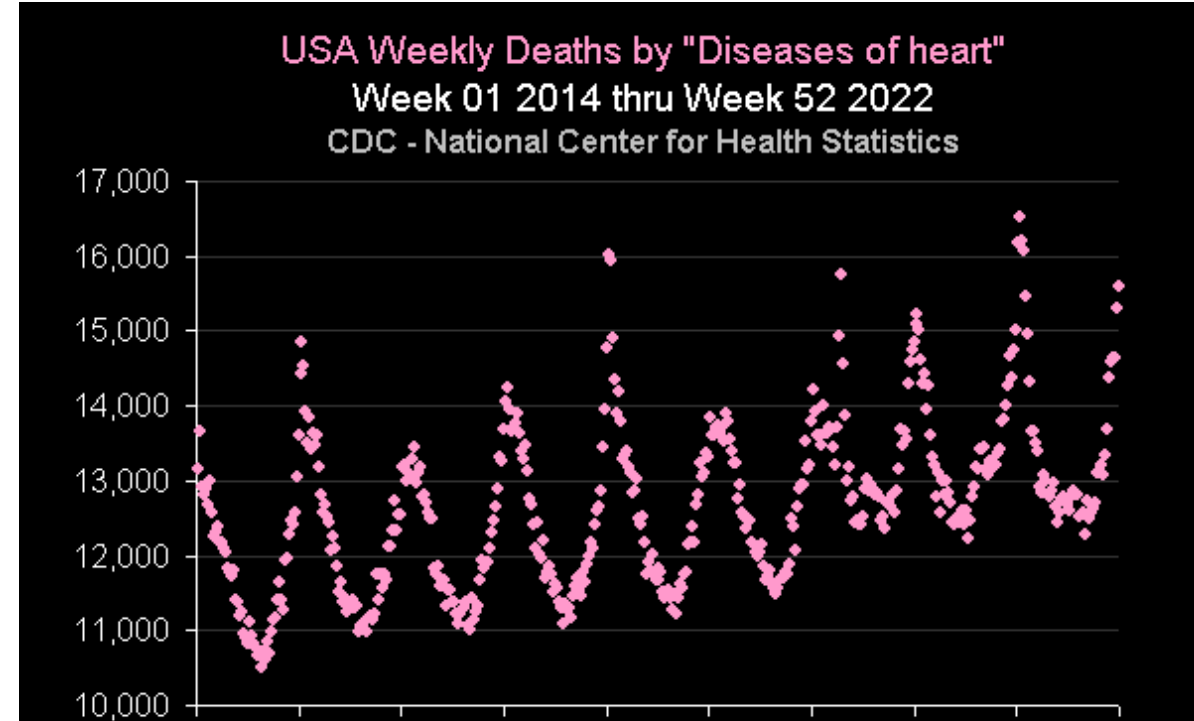

Wikipedia - Midazolam  
<https://en.wikipedia.org/wiki/Midazolam>

A **ventilator** is a piece of medical technology that provides mechanical ventilation by moving breathable air into and out of the lungs, to deliver breaths to a patient who is physically unable to breathe, or breathing insufficiently.

Wikipedia - Ventilator  
[https://en.wikipedia.org/wiki/Medical\\_ventilator](https://en.wikipedia.org/wiki/Medical_ventilator)

**Curious Coincidence #4**

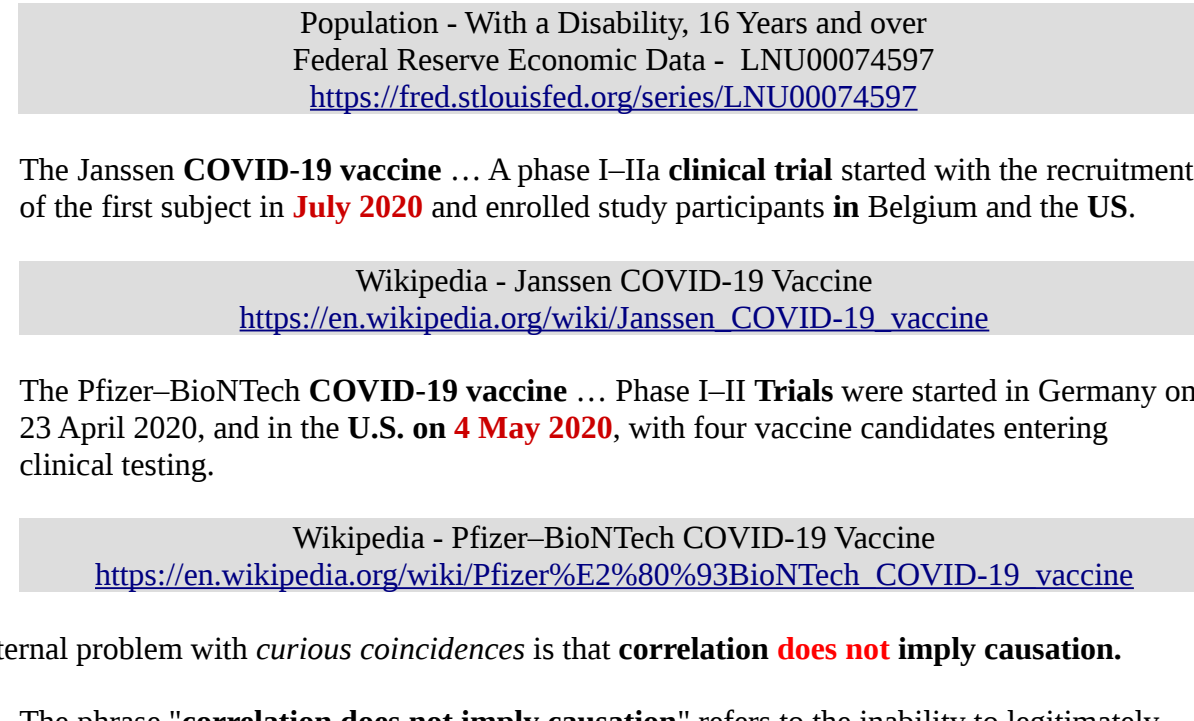

A *step change* in annual **Heart Disease Deaths** very curiously coincides with the **CV19 panic**.

CDC - National Center for Health Statistics  
Weekly Counts of Deaths by State and Select Causes  
2014-2019  
<https://data.cdc.gov/NCHS/Weekly-Counts-of-Deaths-by-State-and-Select-Causes/3yf8-kar>

**Curious Coincidence #5**

The steady increase of 4,315,000 in the **US population with a disability** since **July 2020** very curiously coincided with the trials and subsequent rollout of the **CV19 vaccines**.

Population - With a Disability, 16 Years and over  
Federal Reserve Economic Data - LNU00074597  
<https://fred.stlouisfed.org/series/LNU00074597>

The Janssen **COVID-19 vaccine** ... A phase I-IIa **clinical trial** started with the recruitment of the first subject in **July 2020** and enrolled study participants in Belgium and the **US**.

Wikipedia - Janssen COVID-19 Vaccine  
[https://en.wikipedia.org/wiki/Janssen\\_COVID-19\\_vaccine](https://en.wikipedia.org/wiki/Janssen_COVID-19_vaccine)

The Pfizer-BioNTech **COVID-19 vaccine** ... Phase I-II **Trials** were started in Germany on 23 April 2020, and in the **U.S. on 4 May 2020**, with four vaccine candidates entering clinical testing.

Wikipedia - Pfizer-BioNTech COVID-19 Vaccine  
[https://en.wikipedia.org/wiki/Pfizer%E2%80%93BioNTech\\_COVID-19\\_vaccine](https://en.wikipedia.org/wiki/Pfizer%E2%80%93BioNTech_COVID-19_vaccine)

The eternal problem with *curious coincidences* is that **correlation does not imply causation**.

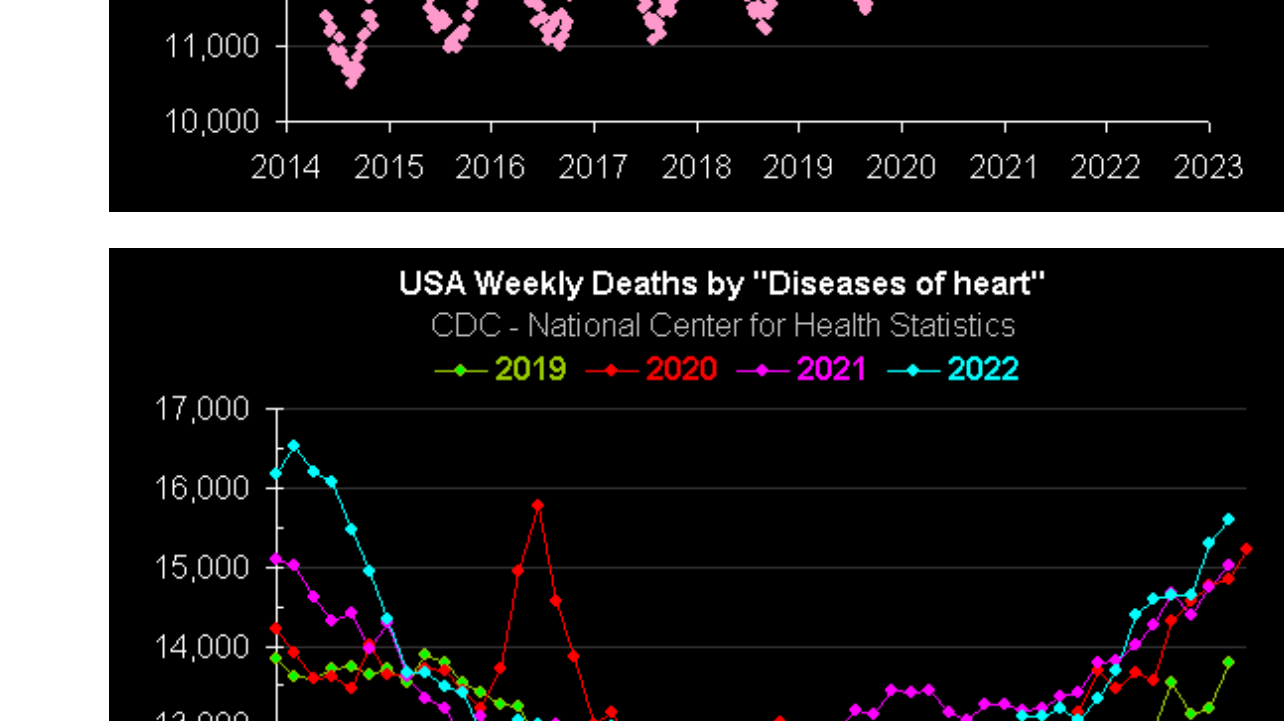

The phrase "**correlation does not imply causation**" refers to the inability to legitimately deduce a cause-and-effect relationship between two events or variables solely on the basis of an observed association or correlation between them.

Wikipedia - Correlation Does Not Imply Causation  
[https://en.wikipedia.org/wiki/Correlation\\_does\\_not\\_imply\\_causation](https://en.wikipedia.org/wiki/Correlation_does_not_imply_causation)

However, *curious coincidences* suggest further investigations are justified.

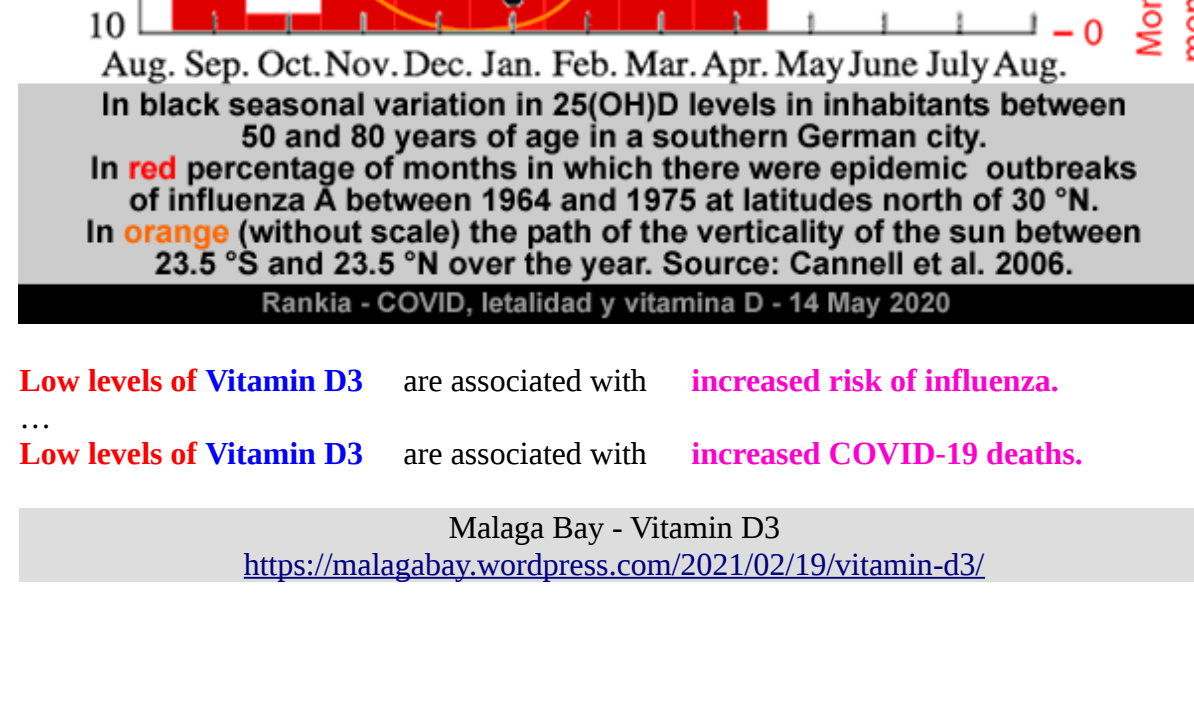

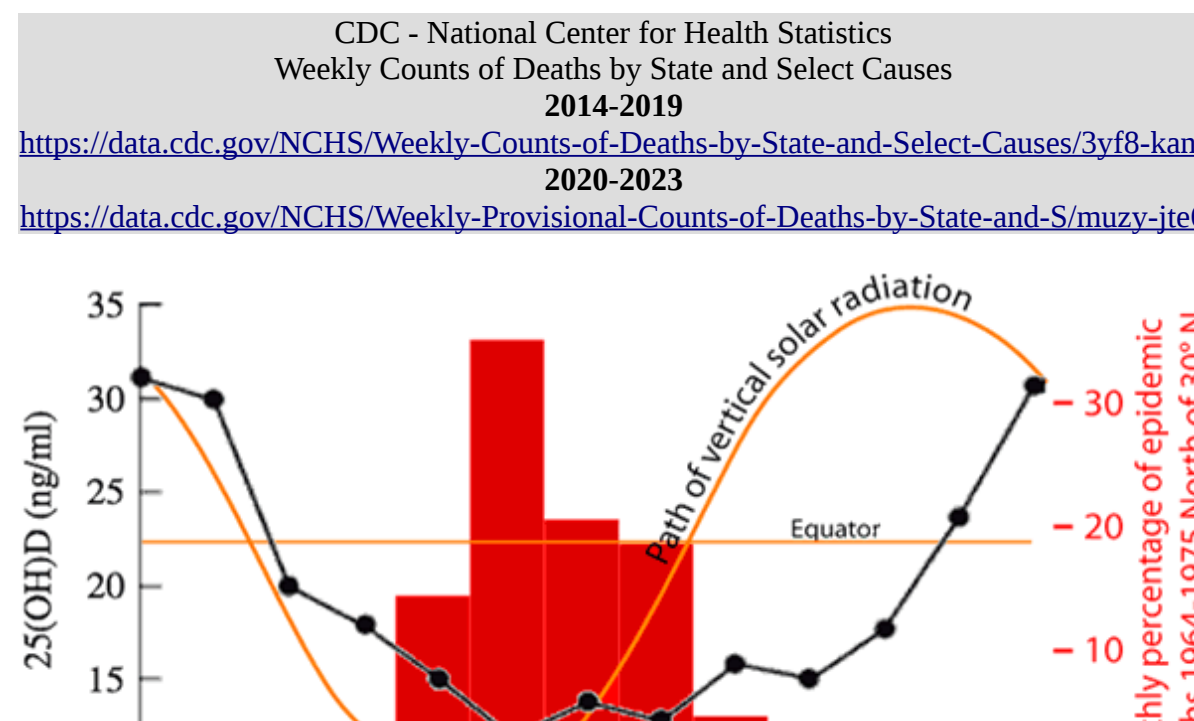

Therefore, as always:

Review the evidence and draw your own conclusions.

**Footnote**

Whether the sharp winter spikes in **Heart Disease Deaths** are associated with **Solar Strength** and/or **Vitamin D Levels** and/or **Inappropriate Treatment** remains a *medical mystery*.

**Low levels of Vitamin D3** are associated with **increased risk of influenza**.

**Low levels of Vitamin D3** are associated with **increased COVID-19 deaths**.
